¹⁾ Asymmetrical power output functionality was released in August 2024, please confirm version with Solplanet's sales staff before purchase.

²⁾ AFCI functionality was released in April 2025, please confirm version with Solplanet's sales staff before purchase.

³⁾ The latest optimised platform design supports MPP voltage range at 150 V~950 V, pending subsequent certificate updates.

⁴⁾ Modbus TCP functionality was released in April 2025, please confirm version with Solplanet's sales staff before purchase.

⁵⁾ When connecting to Solplanet's Ai-HB G2 Series batteries (with only 5 kWh, i.e. two modules), limitations as below apply:

1.The maximum open circuit voltage of PV shall not exceed 750 V;

2.The battery nominal voltage range is reduced to 102.4 V for the particular operation;

3.The maximum charging and discharging current depends on the operating point and is within the range greater than 25 A, less than 30 A.
